1. Supplies/Services and Prices, Page 48 paragraph V Transportation, subparagraph 4 is revised as follows:

For all shipments to OCONUS Distribution Facilities, all products are required to be palletized in full vanioad quantities. Full vans of product are required for delivery to one individual OCONUS Distribution Facility. A full vanioad is defined as a container that reaches 80% Usable Capacity, either by Volume (Cube) or by Weight (Lbs) using the Container Capacity table below for reference. Containers that contain less than 80% Usable Capacity must be approved by the Contracting Officer, prior to being booked in DTS. Justification for less than 80% full must be submitted at the time of request.

80% Utilization Regulrement:
